These compact fluorescent lamps can be operated on battery, solar or ac power. They are suitable for high-voltage and low-voltage ranges. They can also be fully dimmed. Their dimensions and wattages are identical to those of the successful standard OSRAM DULUX D models. The fact that they can be used with separate electronic control gear means they can be connected to almost any type of power supply, including ac, batteries and solar cells. Major applications include dimming and battery-powered emergency lighting in department stores, office buildings and so on.

- Comfortable light in ECG operation
- Shortened base casing to prevent two-pin lamps being fitted in new D/E holders, but still still fits in old D/E holders
